Technical Skills

Programming Languages: Python, Java, C/C++, JavaScript, TypeScript, PHP, SQL

Frontend: React.js, Next.js, Angular, Redux, TailwindCSS, HTML, CSS, Bootstrap

Backend: Node.js, Express.js, Laravel, MySQL, MongoDB, Firebase, REST APIs

AI Skills: Prompt Engineering, AI Tool Integration, AI-based Automation, Data Processing with AI, Machine Learning Concepts

Developer Tools: VS Code, GitHub, cPanel, Vercel, Netlify, Microsoft 365

Experience

PricewaterhouseCoopers (PwC) India

Dec 2025 – March 2025

Tech Intern

Gurgaon

- Worked as a **Full Stack Developer**, handling **application architecture**, **database integration**, **API development**, and **system-level implementation** for social sector projects.
- Understood the **technical needs of social sector programs** and helped build practical and scalable digital solutions.
- Helped PwC in **understanding client requirements** and converting them into clear and working software features.
- Developed and enhanced **portals, dashboards, and reports** for better data tracking and decision making.
- Built an **AI-powered tool** with around **80% technical contribution**, helping in automation, faster processing, and improving team productivity.
- Supported the team in **testing, data validation, system support, and technical documentation** for smooth execution.

Projects

Autism and Audiology Clinic Service Website

[GitHub](#)

[Deployed Link](#)

- Developed a clinic management website with features to **schedule therapists** and **assign clients** easily.
- Implemented **one-click client information access** to view patient details quickly.
- Added special modules designed for **children with special needs** to manage therapy progress and sessions.
- Built an **online consultancy booking system** for easy appointment scheduling.
- Designed a **simple and user-friendly interface** for smooth clinic operations.

Page Replacement Algorithm Simulator (MERN Stack)

[GitHub](#)

- Built an interactive web-based simulator for FIFO, LRU, MRU, and Optimal page replacement algorithms.
- Implemented real-time visualization of page hits and page faults using dynamic charts (Pie and Bar graphs).
- Developed a complete MERN stack application with Node.js, Express.js, and MongoDB to store simulation history and user data.

Handwritten Digit Recognition (MNIST)

[GitHub](#)

- Developed a Convolutional Neural Network (CNN) model trained on the MNIST dataset, achieving **98% accuracy**.
- Implemented using TensorFlow and Keras for high-performance image classification.
- Deployed the model using Flask with a simple web interface for real-time digit prediction.

Leadership and Involvement

Leadership Roles

- **GSSoC Contributor** – Contributed to open-source projects using **Git** and **GitHub**.
- **Club Manager** – Led and managed a college club with over **500+ members**.
- **Beatbox Artist** – Performed at events, improving **communication skills, stage presence**, and confidence.

Education

Graphic Era Hill University, Dehradun

2022 – 2026

B.Tech in Computer Science and Engineering

7.5/10 CGPA

Kendriya Vidyalaya ITBP, Dehradun, Uttarakhand

2019 – 2022

Senior Secondary (12th): 85% — Secondary (10th): 86%
